

**COURSE TITLE** **Walking in the Editor's Shoes: Peer reviewing and journal editing for young researchers in health sciences (all disciplines)**

**Course Description**

Early career scientists (late-stage PhD students, and postdocs) are involved in manuscript peer review as authors and reviewers. As reviewers they influence what is published, and need to understand the full decision making process. The course offers theoretical background and practical training in evaluating manuscripts at all stages of peer review, from pre-screen to final decision, in the roles of reviewers, handling editors, and editors-in-chief. We offer interactive lectures, single studies and supervised group work, and use examples from the real world of an interdisciplinary public health journal to perform a wide range of hands-on exercises.

**Learning Goals**

The course concentrates on the tasks and responsibilities of reviewers and editors. Participants will learn pre-screen and peer-review criteria, will train to write concise and useful reviews, evaluate revisions, take decisions on manuscripts and communicate these. Students will learn best practice standards in scientific publishing, and get to know tools to handle misconduct. They will understand editorial strategies to increase the impact of a journal, and new trends in peer review and scholarly publishing. The course improves reviewing skills and prepares for an appointment as associate editor.

**Workload & ECTS**

~30 student working hours distributed over 4 weeks, 1.0 ECTS

**Dates & Time**

Begin: 30 October 2018, end: 29 November 2018, 4 phases:

Phase 1: 30 Oct - 12 Nov: homework (online) (~3 hours)  
 Phase 2: 13 Nov: in-class course Day 1 - 9:15-18:00h (~8 hours)  
 Phase 3: 14 Nov – 28 Nov: homework (online) (~11 hours)  
 Phase 4: 29 Nov: in class course Day 2 - 9:15-18:00h (~8 hours)

**Teachers**

Prof. Nino Künzli MD, PhD, Deputy Director, Swiss Tropical & Public Health Institute, Basel, Director Swiss School of Public Health, Co-Editor in Chief International Journal of Public Health  
 Anke Berger PhD, Managing Editor International Journal of Public Health

**Eligibility**

Advanced PhD students (at least 2<sup>nd</sup> year with publication experience), postdocs and junior researchers, from all disciplines of health sciences e.g. Epidemiology, Public Health, Medicine, Nursing Sciences, and others.

**Registration Deadline**

15 September 2018 at <https://pphs.unibas.ch/phd-students/pphs-training/pphs-workshop/>

**Fees**

PPHS PhD students of the University of Basel and associated institutes	Free
PhD students enrolled in the inter-university SSPH+ PhD Programs Public Health and Health Economics	Free
Any other researchers of University of Basel and associated institutes	750 CHF
PhD students from the University of Basel and other universities	425 CHF
All other participants	900 CHF

**Location**

Swiss Tropical and Public Health Institute, Socinstrasse 57, 4051 Basel, Switzerland, Seminar Room Matterhorn.
