

Adriana Ardila-Sierra was born in Bogotá, Colombia. She holds a Medical Doctor and Master and Ph.D. degrees in Public Health from the Universidad Nacional de Colombia. Her Doctorate thesis, about medical labour under neoliberalism, received a meritorious distinction.

She has more than 15 years of experience working in Colombian health institutions, including the National Department of Science, Technology, and Innovation – Colciencias, and the National Institute of Health.

As a Public Health Researcher at the Fundación Universitaria de Ciencias de la Salud, she recently conducted an ethnographic analysis of a new health care model for indigenous communities and other scattered populations in rural areas.

Lately, she was named the Health Determinants Subdirector at the Secretaría Distrital de Salud de Bogotá (Bogota District's Health Secretary).
